

A man with a beard, wearing a black beanie, a black t-shirt, blue jeans, and brown boots, is seen from the back. He has a large, dark, multi-pocketed backpack on his back. He is standing on a rocky ledge, looking out over a vast, misty, and mountainous landscape. The scene is bathed in soft, golden light, suggesting early morning or late afternoon. In the top left corner, there are some green pine branches.

# LOOKING FOR AN INTERNSHIP?

DISCOVER OUR POSITIONS.

**PHPRO<sup>+</sup>**

Enterprise PHP Solutions

Hi,

We are a technical partner to develop PHP applications. Not marketing driven, we are techies who take care of building a reliable, integrated and high-performing website, webshop or application.

Our vision is to develop applications that are extendable and supportable in the long term. Therefore, we use a well-defined project approach and proven software methodologies. But most of all we understand it's all about people.

## IT'S ALL ABOUT THE PEOPLE

And when it comes to our people we make sure they love their job. If you don't feel good that will reflect on the project. So we try to keep our professional approach fun to use.

Please contact us at [info@phpro.be](mailto:info@phpro.be) if there is an internship that suits you.

-  12 Zend certified engineers
-  10 Magento certified developers
-  6 Certified Scrum Masters
-  3 Symfony certified developers
-  3 Acquia certified developers

## OUR CLIENTS

---

MAGENTO

---

Magento is the award-winning PHP e-commerce platform that allows merchants to build powerful webshops. Many aspects, such as usability and extensibility, make Magento the fastest growing e-commerce product currently available.

Magento is open source technology which is free for everyone. Along with this powerful asset Magento is the specialized e-commerce platform in current e-commerce era.

PHPro is a Magento Silver Solution Partner with 14 Magento Certified Developers in our team! According to magecertland.com the biggest in Belgium!

We take Magento projects to the next level by integrating the

Magento platform with every possible backend platform, ERP, CRM systems customers are using. You are always welcome to have a chat about your ideas. Let's make your ideas greater together!

PHPro has created several modules for Magento, some are free for the community, some need to be bought. We get inspired by trends in the e-commerce world and ideas from existing customers.

## OPTION 1 OMNI-CHANNEL PLATFORM SETUP

---

### WHO ARE WE LOOKING FOR?

As an intern you will be assigned to a possible omni-channel platform setup. Nowadays merchants want a single master data view on customers and products. The first is often managed in a CRM platform, the latter in a PIM platform.

You will have to setup and connect Magento (e-commerce platform) with OroCRM (CRM platform) and Akeneo (PIM platform). All of these platforms are PHP Open Source. Together with an e-commerce consultant you will work out important business flows that merchants are facing.

After this, you will be assigned to connect these platforms. You will talk with developers and system admins to setup these platforms and connect them. As the project evolves other tools will be added.

### SKILLSET

- ▶ Analytical skills
- ▶ Designing business flows
- ▶ E-commerce knowledge
- ▶ Magento backend development
- ▶ Magento frontend development
- ▶ OroCRM configuration
- ▶ Akeneo configuration

## OPTION 2 MODULE DEVELOPMENT

---

### WHO ARE WE LOOKING FOR?

As an intern you will be assigned to a new module. Together with one of our e-commerce consultants you will work out a general idea for a new module. After this, you will be assigned the development of this module from start to end.

Meaning you will need to talk to developers and Magento experts about what is possible and what is the best way to create your module. You will write a document explaining what the module will do and create wireframes accordingly.

### SKILLSET

- ▶ Analytical skills
- ▶ Good people skills
- ▶ E-commerce knowledge
- ▶ Magento backend development
- ▶ Magento frontend development

---

DRUPAL

---

# Drupal™

For our CMS projects we highly rely on Drupal as the proven platform for content management systems. Drupal helps us build everything from personal blogs to enterprise applications. Thousands of add-on modules and designs let you build any site you can imagine.

Most of our Drupal developers are Acquia Certified. Currently a lot of research is being done on Drupal 8.

Drupal 8 is constantly in development, even though a first version has been released. The work on Drupal 8 is divided into categories, called Core initiatives: Mobile, Layouts, Web Services, Configuration Management, Multilingual, and HTML5.

## OPTION 3 DRUPAL 8 UPDATE

---

### WHO ARE WE LOOKING FOR?

For Drupal we are currently doing research on Drupal 8. A first version has been released recently. More specifically we want to upgrade the Drupal 7 website of one of our clients as a tryout - business case, in order to establish a good base for the future.

As an intern you will dig into the existing functional, perform a technical analysis and do research in the first place on how to upgrade to Drupal 8.

The following step will be to fully transform the Drupal 7 site to a Drupal 8 installation. This means not only Drupal 'core' research & development, but also upgrading popular modules.

So you will have to analyze, discuss with the project manager, with the lead developer, ... in order to realize the end goal : a fully working Drupal 8 website. One of the lead developers will assist you in this.

### SKILLSET

- ◆ Analytical skills
- ◆ Good people skills
- ◆ Drupal 7 & 8
- ◆ PHP, CSS, HTML, JS

Faradoo is a great tool for a company to manage the skills and planning of their talent pool. Faradoo is an application developed and used by PHPro and other Cronos companies.

Faradoo's goal is to help companies manage the skills, profiles and planning of their people. At this moment it is in the process of becoming a product that people can buy and immediately start using by registering on the Faradoo website.

It is a multi-tenant environment where Docker allows us to easily start up new instances of Faradoo for other Cronos companies or customers. Faradoo is a great project for internships seeking experience in custom web application development using Symfony or AngularJS.

## OPTION 4 FARADOO DEVELOPMENT

---

### WHO ARE WE LOOKING FOR?

For Faradoo we are continuously improving the product and working on new features. As an intern you will be assigned one of more new features, which you would have to analyze, discuss with the project manager, with the lead developer, ...

As soon as the feature has been worked out in functional specifications, you will need to develop the feature, with the help of a lead developer.

### SKILLSET

- ▶ Analytical skills
- ▶ Good people skills
- ▶ Symfony 2
- ▶ Angular
- ▶ HTML 5
